### Sunshine Biscuits Contain More Food Value For The Money Than Almost Any Food You Buy

In these days you should know, in a general way at least, which foods provide the most nourishment.

The following table, taken from a report of the U. S. Department of Agriculture, will give you a general idea of the energy value of various staple foods and how they compare with crackers.

Food	Calories of Energy Per Pound
Crackers - - -	1925
Rice (dry) - - -	1620
White Bread - - -	1200
Sirloin Beef - - -	975
Tenderloin Pork - - -	895
Leg Lamb - - -	860
Eggs - - -	635
Baked Beans - - -	555
Salt Codfish - - -	325
Milk - - -	310
Potatoes - - -	295

Sunshine Biscuits are all food. You buy no waste and no water. That's why they are so economical.

Then do not overlook their purity and cleanliness, their deliciousness and their fresh crispness.

Nor their endless variety. There are over three hundred and fifty different kinds of Sunshine Biscuits—a kind for every possible occasion.

### Notice to Dealers

While we have tried to call on all merchants handling biscuits, cookies, and crackers, and explain our dealers' co-operative sales plan—of which this advertisement is a part—our salesmen may not have seen some of our dealer friends in all the territory where this paper circulates. To such merchants we say, please accept these coupons when presented by your customers and sell them the Sunshine Biscuits as advertised. We will redeem all coupons.
